Globalisation, Employment and Education in Sri Lanka Nov 29 2022 Since the late 1970s, Sri Lanka has undergone a socio-economic transformation, from protectionism towards economic liberalisation and increasing integration into the world economy. Through a systematic comparison of these periods of economic change (1956–1977, and 1977 to the present), Angela W. Little and Siri T. Hettige examine the impact of this transformation on education, youth employment and equality of opportunity in Sri Lanka. The book charts Sri Lanka's shift from a predominantly agricultural economy to one dominated by services and manufacturing, a reduction in unemployment, rising educational and occupational levels, expectations and achievements, and a reduction in poverty. In turn, it reveals a growing role for the private sector and foreign interests in post-secondary education and a modest growth in private education at the primary and secondary levels, as well as widening social disparities in access to qualifications, training and skills. The Sri Lankan experience of, and engagement with, globalisation has been tempered by a long-running ethnic conflict that hindered economic and social development and diverted considerable public funds into defence and war. Now that the war is 'won', the challenge is how to invest in human resource development and the fulfilment of the expectations of youth from all ethnic and social groups. This challenge requires serious policy analysis, the generation of more state revenues, the reallocation of existing public resources, and a political commitment to the winning of a sustainable peace and stability. This book makes an important contribution to the broader international literature on the implications of globalisation for education policy and practice, and to the interaction of exogenous and endogenous forces for educational change. It deals with the tension between the high social demand for education and the growing demand for specialised skills in a changing economy. As such, it has a wide interdisciplinary appeal across education policy and politics, Asian education, South Asian society, youth policy, sociology of education, political economy of social change, and globalisation.

World Education Indicators 2001 Teachers for Tomorrow's Schools Jan 26 2020 This report surveys teaching and learning conditions in 18 mainly developing countries - Argentina, Brazil, Chile, China, Egypt, India, Indonesia, Jordan, Malaysia, Paraguay, Peru, the Philippines, Uruguay, the Russian Federation, Sri Lanka, Thailand, Tunisia and Zimbabwe - and OECD countries.

NEW REALITIES, MOBILE SYSTEMS AND APPLICATIONS Nov 05 2020 This book devotes to new approaches in interactive mobile technologies with a focus on learning. Interactive mobile technologies are today the core of many--if not all--fields of society. Not only the younger generation of students expects a mobile working and learning environment. And nearly daily new ideas, technologies and solutions boost this trend. To discuss and assess the trends in the interactive mobile field are the aims connected with the 14th International Conference on Interactive Mobile Communication, Technologies and Learning (IMCL2021), which was held online from 4 to 5 November 2021. Since its beginning in 2006, this conference is devoted to new approaches in interactive mobile technologies with a focus on learning. Nowadays, the IMCL conferences are a forum of the exchange of new research results and relevant trends as well as the exchange of experiences and examples of good practice. Interested readership includes policy makers, academics, educators, researchers in pedagogy and learning theory, school teachers, learning Industry, further education lecturers, etc.

The Challenge of Youth Employment in Sri Lanka Apr 30 2020 Sri Lanka has long been regarded as a model of a successful welfare state in a low-income setting, yet it has not succeeded in creating a sufficient number of good jobs for the increasing number of young people. Hence, young Sri Lankans perceive their country as an unjust and unequal society, in which mainstream institutions have failed to address inequalities in the distribution of resources, as well as of benefits deriving from economic growth. Against this background, 'The Challenge of Youth Employment in Sri Lanka' aims to identify ways to improve the opportunities available to new job market entrants by addressing existing inequalities and to help young people more fully realize their potentials. Drawing from original research and a review of existing studies, the authors use the 4Es conceptual framework to analyze four key aspects of labor markets employment creation, employability, entrepreneurship, and equal opportunity identifying main issues and results, current trends, and possible new approaches.

The National Qualifications Framework for Skills Training Reform in Sri Lanka Jun 12 2021 The National Vocational Qualifications Framework of Sri Lanka was developed in conformity with the socioeconomic milieu and the needs of the labor market with the participation of industry stakeholders. It has enhanced the role of the government in policy and regulation, and the role of the private sector in providing skills training. A unified system with seven levels covering 96 occupations at the craft level, 14 fields at the middle technician level, and 4 courses of study at the degree level, it has reduced the complexity and ambiguity of training and selecting competent workers. This publication describes the progress and challenges in developing, implementing, and monitoring this ambitious scheme, with lessons for developing skills qualification frameworks in other countries.

Sri Lanka May 24 2022 The new sixth edition of Bradt's Sri Lanka is the longest and by far the most comprehensive guidebook ever published to this alluring island nation, and now includes a brand new, detailed, full-colour wildlife section. Freshly researched and completely rewritten by Philip Briggs, one of the world's most experienced and highly regarded guidebook writers, the new Bradt guide incorporates detailed coverage of every aspect of this diverse and compact land, from the idyllic tropical coastline to the misty forests of Hill Country. Not only does the book provide in-depth sections on all major beach resorts, archaeological reserves, historic towns and national parks, but it also introduces adventurous travellers to a host of intriguing lesser-known sites, along with many emergent destinations inaccessible for decades prior to the end of the civil war in 2009. Extensive hotel and restaurant listings, covering everything from exclusive boutique hotels to shoestring homestays, have been compiled from scratch rather than updated from historical information, with each entry having been cherry-picked by the author based on his personal inspection of hundreds upon hundreds of properties countrywide. More than 70 newly drawn maps cover all towns and resorts of note, as well as the main national parks and their surrounds. Sri Lanka has enjoyed a high level of political stability and safety since the civil war ended in May 2009, encouraging a tourist boom in the south, and the gradual opening of the north and east to independent travel. Beach holidays are an all-year attraction, while a host of fantastic Buddhist-affiliated UNESCO World Heritage Sites ranges from the massive dagobas of Anuradhapura, built in pre-Christian times on a scale to rival the Egyptian pyramids, to the exquisitely painted cave temples of Dambulla. Wildlife-viewing opportunities abound, and this guide provides unparalleled, illustrated advice on making the most of these. Asia's densest wild elephant and leopard populations are protected in the island's extensive network of national parks, and there's also fine offshore whale and dolphin-watching, and a bird checklist of 450 species including more than 30 endemics.

Everyday Ethnicity in Sri Lanka Sep 27 2022 Focusing on notions of diaspora, identity and agency, this book examines ethnicity in war-torn Sri Lanka. It highlights the historical development and negotiation of a new identification of Up-country Tamil amidst Sri Lanka's violent ethnic politics. Over the past thirty years, Up-country (Indian) Tamils generally have tried to secure their vision of living within a multi-ethnic Sri Lanka, not within Tamil Eelam, the separatist dream that ended with the civil war in 2009. Exploring Sri Lanka within the deep history of colonial-era South Asian plantation diasporas, the book argues Up-country Tamils form a "diaspora next-door" to their ancestral homeland. It moves beyond simplistic Sinhala-Tamil binaries and shows how Sri Lanka's ethnic troubles actually have more in common with similar battles that diasporic Indians have faced in Fiji and Trinidad than with Hindu-Muslim communalism in neighbouring India, Pakistan and Bangladesh. Shedding new light on issues of agency, citizenship, displacement and re-placement within the formation of diasporic communities and identities, this book demonstrates the ways that culture workers, including politicians, trade union leaders, academics and NGO workers, have facilitated the development of a new identity as Up-country Tamil. It is of interest to academics working in the fields of modern South Asia, diaspora, violence, post-conflict nations, religion and ethnicity.

Restitching Identities in Rural Sri Lanka Aug 15 2021 Sandya Hewamanne's *Stitching Identities in a Free Trade Zone* analyzed how female factory workers in Sri Lanka's free trade zones challenged conventional notions about marginalized women at the bottom of the global economy. In *Restitching Identities in Rural Sri Lanka* Hewamanne now follows many of these same women to explore the ways in which they negotiate their social and economic lives once back in their home villages. Drawing on ethnographic fieldwork conducted over fifteen years, the book explores how the former free-trade-zone workers manipulate varied forms of capital—social, cultural, and monetary—to become local entrepreneurs and community leaders, while simultaneously initiating gradual changes in rural social hierarchies and gender norms. Free trade zones introduce Sri Lankan women to neoliberal ways of fashioning selves, Hewamanne contends. Her book illustrates how varied manifestations of neoliberal attitudes within local contexts result in new articulations of what it is to be an entrepreneur as well as a good woman. By focusing on how former workers decenter neoliberal market relations while using their entrepreneurial and civic activities to reimagine social life in ways more satisfying to them and their loved ones—what the author calls a politics of contentment—the book sheds light on new political possibilities in contexts where both reproduction of neoliberal economic relations and implementation of alternatives co-exist.

Women in Terrorism Feb 27 2020 *Women in Terrorism* examines the growing number of women actively engaged in terrorist activity and considers the significance of this for theorising gender, conflict and social politics. Toward that end, the book studies Tamil women combatants of the Liberation Tigers of Tamil Eelam (LTTE), an armed resistance group identified as one of the deadliest terrorist groups globally. Drawing on narrative life histories, the book canvasses three decades of ethno-nationalist war in Sri Lanka contributing to a major social change for Tamil women in Jaffna. It identifies the LTTE as providing an 'alternative' familial kinship founded upon friendship, which transcends caste and religion. The book reveals that the LTTE combatant woman's paradoxical equality may differ from Western feminist notions of emancipation, but represents a profound change within its own patriarchal society. This original book presents the argument that engagement in armed conflict has transformed combatant women's understanding of themselves into female slayers of injustice and protectors of the Tamil nation, with a (re)constructed gender identity and sense of empowerment.

Economy, Culture, and Civil War in Sri Lanka Jul 26 2022 This title is an examination of the everyday economy, experiences, and livelihoods in the context of Sri Lanka's civil war. It argues that the war is grounded not just in the goals and intentions of the opposing sides, but also in the everyday orientations, experiences, and material practices of all Sri Lankan people.

Sri Lanka May 31 2020 This paper discusses Sri Lanka's Fifth Review under the Extended Arrangement under the Extended Fund Facility, Request for Waivers of Nonobservance of Performance Criteria, extension of the arrangement, and rephasing of purchases. The Central Bank of Sri Lanka maintained a tight monetary policy stance, intervening in the foreign exchange market and allowing for greater exchange rate flexibility in response to rising pressures. The Sri Lankan economy remains vulnerable to shocks, given high public debt, large refinancing needs, and low external buffers. Although domestic uncertainty remains elevated, the authorities are committed to strengthen the resilience of the economy through a strong policy mix, with prudent monetary policy, greater exchange rate flexibility, and revenue-based fiscal consolidation. Continued implementation of structural reforms is essential to support strong and inclusive growth. Efforts should focus on liberalizing trade, improving the business environment and promoting investment, strengthening governance, encouraging female and youth labor force participation, enhancing social protection, and improving crisis preparedness to natural disasters.

'Feminization' of Teaching Profession in Sri Lanka Mar 10 2021 Scientific Essay from the year 2011 in the subject Pedagogy - The Teacher, Educational Leadership, , language: English, abstract: Krieg (2005) in his review of impact of teacher gender on student gender states that while a large body of research focuses on the gender of students, less research explores the impacts of a teacher's gender on students (Hopf &

Hatzichristou 1999). Evidence suggests that male teachers tend to be more authoritative whereas female teachers tend to be more supportive and expressive (Meece, 1987). A survey of 20 teachers indicates that male teachers are likely to select a more aggressive disciplinary approach toward boys while teachers of either gender tended to ignore boys' disruptive behavior than that of girls when the behavior was not aggressive (Rodriguez, 2002). Krieg (2005) further reveals that researchers have found that teachers interact differently with students of similar gender than they do with students of opposite gender Einarsson, C., & Granström, K. (2002) This includes evidence suggesting disciplinary procedures and proclivity to discipline vary by both student and teacher gender. Likewise, a teacher's perception of student characteristics and abilities appear to systematically vary by gender. Other studies find male students benefit at the expense of female students in the amount and quality of interaction received from teachers of both genders. What has yet to be determined is how these differences in discipline, perceptions of student ability, and interactions between student and teacher influence student outcomes as measured by standardized exams.

Sri Lanka in the Modern Age Apr 22 2022 Since the late 1970s civil war has left Sri Lanka in an almost permanent state of crisis; conventional histories of the country by liberal and Marxist scholars in the last two decades have thus tended to focus on the state's failure to accommodate the needs and demands of the minorities. The entire history of the twentieth century has been tied to this one key issue. Sri Lanka in the Modern Age offers a fresh perspective based on new research. Above all, the author has written a history of the peoples of Sri Lanka rather than a history of the nation-state.

Buddhist Nuns in Taiwan and Sri Lanka Dec 27 2019 Taking a comparative approach, this fieldwork-based study explores the lives and thoughts of Buddhist nuns in present-day Taiwan and Sri Lanka. The author examines the postcolonial background and its influence on the modern situation, as well as surveying the main historical, economic, and social factors which influence the position of nuns in society. Based on original research, including interviews with nuns in both countries, the book examines their perspectives on controversial issues and in particular those concerning the status of women in Buddhism. Concerns discussed include allegedly misogynist teachings relating to women's inferior karma, that they cannot become Buddhas, and that nuns have to follow additional rules that monks do not. Bridging the gap between feminist theory and the reality of women in religion, the book makes a distinct contribution to the study of women in Buddhism by focusing on nuns from both of the main wings of Buddhism (Theravada and Mahayana) as well as furthering feminist studies of Buddhism and religion in general.

The Oxford Handbook of Politics and Performance Jan 08 2021 While political scientists and political theorists have long been interested in social and political performance, and theatre and performance researchers have often focused on the political dimensions of the live arts, the interdisciplinary nature of this labor has typically been assumed rather than rigorously explored. This volume brings together leading scholars in the fields of Politics and Performance--drawing on experts across the fields of literature, law, anthropology, sociology, psychology, and media and communication, as well as politics and theatre and performance--to map out and deepen the evolving interdisciplinary engagement. Organized into seven thematic sections, the volume investigates the relationship between politics and performance to show that certain features of political transactions shared by performances are fundamental to both disciplines--and that to a large extent they also share a common communicational base and language.

Proceedings of the Future Technologies Conference (FTC) 2021, Volume 3 Feb 01 2023 This book provides the state-of-the-art intelligent methods and techniques for solving real world problems along with a vision of the future research. The sixth Future Technologies Conference 2021 was organized virtually and received a total of 531 submissions from academic pioneering researchers, scientists, industrial engineers, and students from all over the world. The submitted papers covered a wide range of important topics including but not limited to technology trends, computing, artificial intelligence, machine vision, communication, security, e-learning and ambient intelligence and their applications to the real world. After a double-blind peer-reviewed process, 191 submissions have been selected to be included in these proceedings. One of the meaningful and valuable dimensions of this conference is the way it brings together a large group of technology geniuses in one venue to not only present breakthrough research in future technologies but also to promote discussions and debate of relevant issues, challenges, opportunities, and research findings. We hope that readers find the volume interesting, exciting, and inspiring.

Teaching English Literature for the G.C.E. 'O' Level in Sri Lanka Oct 29 2022

Childhood in a Sri Lankan Village Oct 17 2021 Like toddlers all over the world, Sri Lankan children go through a period that in the U.S. is referred to as the "terrible twos." Yet once they reach elementary school age, they appear uncannily passive, compliant, and undemanding compared to their Western counterparts. Clearly, these children have undergone some process of socialization, but what? Over ten years ago, anthropologist Bambi Chapin traveled to a rural Sri Lankan village to begin answering this question, getting to know the toddlers in the village, then returning to track their development over the course of the following decade. *Childhood in a Sri Lankan Village* offers an intimate look at how these children, raised on the tenets of Buddhism, are trained to set aside selfish desires for the good of their families and the community. Chapin reveals how this cultural conditioning is carried out through small everyday practices, including eating and sleeping arrangements, yet she also explores how the village's attitudes and customs continue to evolve with each new generation. Combining penetrating psychological insights with a rigorous observation of larger social structures, Chapin enables us to see the world through the eyes of Sri Lankan children searching for a place within their families and communities. *Childhood in a Sri Lankan Village* offers a fresh, global perspective on child development and the transmission of culture.

The Struggle for a Multilingual Future Mar 29 2020 In *The Struggle for a Multilingual Future*, Christina Davis examines the tension between ethnic conflict and multilingual education policy in the linguistic and social practices of Sri Lankan minority youth. Facing a legacy of post-independence language and education policies that were among the complex causes of the Sri Lankan civil war (1983 - 2009), the government has recently sought to promote interethnic integration through trilingual language policies in Sinhala, Tamil, and English in state schools. Integrating ethnographic and linguistic research in and around two schools during the last phase of the war, Davis's research shows how, despite the intention of the reforms, practices on the ground reinforce language-based models of ethnicity and sustain ethnic divisions and power inequalities. By engaging with the actual experiences of Tamil and Muslim youth, Davis demonstrates the difficulties of using language policy to ameliorate ethnic conflict if it does not also address how that conflict is produced and reproduced in everyday talk.

Integrating Early Childhood Care and Education in Sri Lanka Jul 14 2021 Changes in social and family structures, gender roles, and working environments have led some countries to introduce integrated centers for early childhood care and education (ECCE) for children ages zero to five years, combining the advantages of preschools and childcare centers. ECCE services are becoming increasingly important for countries as a support system for working parents. In countries such as Sri Lanka, where female participation in the labor force is low in comparison with international standards, providing affordable childcare services could also help more mothers to enter the labor market. Responding to the needs of employees, child development centers in the plantation areas in Sri Lanka are already providing integrated childcare services for children in this age group. The increasing demand for affordable childcare services and the growing recognition of the benefits of holistic early childhood development have brought ECCE to the forefront of Sri Lanka's development agenda. Well-designed ECCE systems can improve the lives of children and families and provide significant advantages to national economies. Access to effective ECCE can equalize learning opportunities by improving school readiness and by putting children on a more equal footing at the primary school level. These early advantages have proved to have a lasting impact, affecting both educational and earning potential in the adult years. The significant income inequalities in countries such as Sri Lanka could be addressed through investment in effective ECCE programs, and enhanced understanding of the benefits and potential long-term impacts of ECCE could help governments tailor programs to ensure maximum return on investment. This study seeks to answer the following questions: Is it more effective to provide early childcare and education services separately or in an integrated manner? Under what conditions would the provision of separate care and education services be more effective? The study provides an analysis of the ECCE environment in Sri Lanka, with recommendations for improvement within the current context. The information presented in the study is a starting point to foster the improved understanding of a complex subject area involving multiple stakeholders.

Student Learning in South Asia May 12 2021 This book analyzes the performance of South Asian educational systems and identifies the causes and correlates of student learning outcomes. Drawing on successful initiatives both in the region and elsewhere in the world, it offers an insightful approach to setting priorities for enhancing the quality of school education in South Asia.

Peace at Last in Paradise Dec 19 2021 In this volume Guruge returns to present us with a spellbinding sentimental story that displays the full range of human emotions. A story born of tragic circumstances of the demise of the World Trade Center, encompasses all the strains of race and class that pervaded through the fabric of Sri Lankan society in recent times. It is transformed into an engaging story by the author's exceptional wit, sensitivity and sharp social observation. Author also returns to offer the reader with fascinating verse that brings to life people, events, places and emotions that are vividly presented in the book. Throughout his trilogy, Guruge has demonstrated the value of recording recent history that is mostly oral or confined to individual experiences. In volume three, he has set out, meticulously, and in great detail, the history of the period 1915 to 2009. The more recent part of history, is largely based on his own exceptional knowledge and experience, and recorded as only a true historian -- an accolade he richly deserves, can document. What is fascinating is that he narrates Sri Lankan history within a compelling story of a multiethnic Sri Lankan family.
