Right here, we have countless books **The Idea Of Home In Law Displacement And Dispossession** and collections to check out. We additionally offer variant types and along with type of the books to browse. The adequate book, fiction, history, novel, scientific research, as without difficulty as various extra sorts of books are readily approachable here.

As this The Idea Of Home In Law Displacement And Dispossession, it ends in the works being one of the favored ebook The Idea Of Home In Law Displacement And Dispossession collections that we have. This is why you remain in the best website to see the unbelievable ebook to have.

As recognized, adventure as without difficulty as experience just about lesson, amusement, as well as concurrence can be gotten by just checking out a ebook **The Idea Of Home In Law Displacement And Dispossession** furthermore it is not directly done, you could tolerate even more roughly speaking this life, on the subject of the world.

We meet the expense of you this proper as with ease as simple habit to acquire those all. We manage to pay for The Idea Of Home In Law Displacement And Dispossession and numerous book collections from fictions to scientific research in any way. along with them is this The Idea Of Home In Law Displacement And Dispossession that can be your partner.

Getting the books **The Idea Of Home In Law Displacement And Dispossession** now is not type of inspiring means. You could not lonely going bearing in mind book accrual or library or borrowing from your links to get into them. This is an very easy means to specifically get lead by on-line. This online proclamation The Idea Of Home In Law Displacement And Dispossession can be one of the options to accompany you later having new time.

It will not waste your time. give a positive response me, the e-book will unquestionably ventilate you supplementary matter to read. Just invest tiny times to approach this on-line publication **The Idea Of Home In Law Displacement And Dispossession** as without difficulty as evaluation them wherever you are now.

If you ally need such a referred **The Idea Of Home In Law Displacement And Dispossession** book that will give you worth, get the totally best seller from us currently from several preferred authors. If you desire to funny books, lots of novels, tale, jokes, and more fictions

collections are as well as launched, from best seller to one of the most current released.

You may not be perplexed to enjoy every books collections The Idea Of Home In Law Displacement And Dispossession that we will definitely offer. It is not a propos the costs. Its just about what you compulsion currently. This The Idea Of Home In Law Displacement And Dispossession, as one of the most lively sellers here will utterly be in the middle of the best options to review.

Property Law and Practice provides a detailed examination of the processes involved in freehold and leasehold property transactions, clearly addressing the issues that arise in both the residential and commercial fields. It deals with all the issues confronting the practitioner on a day-to-day basis to provide a complete overview of modern conveyancing practice. This edition has been updated with information on the Leasehold Property Enquiries Form, the designation of all Land Registry offices as proper offices, the proposed regulations to prevent landlords letting properties falling below specified energy efficiency thresholds and commercial rent arrears recovery. It also covers recent developments on chancel liability, flood risk, the Green Deal and changes of use permitted by the GPDO and recent case law on the cancellation of unilateral notices. The easy way to make sense of property law Understanding property law is vital for all aspiring lawyers and legal professionals, and property courses are foundational classes within all law schools. Property Law For Dummies tracks to atypical property law course and introduces you to property law and theory, exploring different types of property interests—particularly "real property." In approachable For Dummies fashion, this book gives you a better understanding of the important property law concepts and aids in the reading and analysis of cases, statutes, and regulations. Tracks to a typical property law course Plain-English explanations make it easier to grasp property law concepts Serves as excellent supplemental reading for anyone preparing for their state's Bar Exam The information in Property Law For Dummies benefits students enrolled in a property law course as well as non-students, landlords, small business owners, and government officials, who want to know more about the ins and outs of property law. Derived from the renowned multi-volume International Encyclopaedia of Laws, this practical analysis of the law of property in Taiwan deals with the issues related to rights and interests in all kinds of property and assets' immovable, movable, and personal property; how property rights are acquired; fiduciary mechanisms; and security considerations. Lawyers who handle transnational disputes and other matters concerning property will appreciate the explanation of specific terminology, application, and procedure. An introduction outlining the essential legal, cultural, and historical considerations affecting property is followed by a discussion of the various types of property. Further analysis describes how and to what extent legal subjects can have or obtain rights and interests in each type. The coverage includes tangible and intangible property, varying degrees of interest, and the various ways in which property is transferred, including the ramifications of appropriation, expropriation, and insolvency. Facts are presented in such a way that readers who are unfamiliar with specific terms and concepts in varying contexts will fully grasp their meaning and significance. The book includes ample references to doctrine and cases, as well as to relevant international treaties and conventions. Its succinct yet scholarly nature, as well as the practical quality of the information it provides, make this book a valuable time-saving tool for any practitioner faced with a property-related matter. Lawyers representing parties with interests in Taiwan will welcome this very useful guide, and academics and researchers will appreciate its value in the study of comparative property law. Derived from the renowned multi-volume International Encyclopaedia of Laws, this practical analysis of the law of property in Slovenia deals with the issues related to rights and interests in all kinds of property and assets—immovable, movable, and personal property; how property rights are acquired; fiduciary mechanisms; and security considerations. Lawyers who handle transnational disputes and other

matters concerning property will appreciate the explanation of specific terminology, application, and procedure. An introduction outlining the essential legal, cultural, and historical considerations affecting property is followed by a discussion of the various types of property. Further analysis describes how and to what extent legal subjects can have or obtain rights and interests in each type. The coverage includes tangible and intangible property, varying degrees of interest, and the various ways in which property is transferred, including the ramifications of appropriation, expropriation, and insolvency. Facts are presented in such a way that readers who are unfamiliar with specific terms and concepts in varying contexts will fully grasp their meaning and significance. The book includes ample references to doctrine and cases, as well as to relevant international treaties and conventions. Its succinct yet scholarly nature, as well as the practical quality of the information it provides, make this book a valuable time-saving tool for any practitioner faced with a property-related matter. Lawyers representing parties with interests in Slovenia will welcome this very useful guide, and academics and researchers will appreciate its value in the study of comparative property law. An innovative examination of the law's treatment of property, this student textbook provides an extremely useful and readable account of general property law principles. It draws on a wide range of materials on property rights in general, and the English property law system in particular, looking at all kinds of property, not just land. It includes the core legal source materials in property law along with excerpts from social science literature, legal theory, and economics, many of which are not easily accessible to law students. These materials are accompanied by a critical commentary, as well as notes, questions and suggestions for further reading. It will be of interest to undergraduate property law students and to non-law students taking property law modules in courses covering planning, environmental law, economics and estate management. This casebook covers the philosophy and concepts of personal property law and the impact of evolving business practices on the development of the law. "This volume in the Studies of the Oxford Institute of European and Comparative Law is the result of a research workshop held at the University of Seville in 2018 to coincide with the 500th anniversary of the Law Faculty of Seville. The workshop was organised by the Centro de Derecho Comparado of the Law Faculty of the University of Seville and the Institute of European and Comparative Law of the Law Faculty of the University of Oxford."--ECIP Preface. The rule of law is widely perceived to be a public law doctrine, concerned with the way governmental authority conforms to dictates of law. This book explores the idea that the rule of law instead concerns the conditions under which any relationship - that among citizens as well as that between citizens and the state - becomes subject to law. Property law is concerned with a wider variety of rights, obligations and interests than most other areas of law, and can prove daunting to those studying the subject for the first time. Commonwealth Caribbean Property Law sets out in a clear and concise manner the central principles of the law of real property in the region, in order to guide students through this often complex core subject area. In this new edition, the book has been fully revised and updated to include important new case law from the various Caribbean jurisdictions and an expanded appendix of working documents. With comprehensive coverage of the main topics studied by undergraduates, such as Leases, Co-Ownership, Restrictive Covenants, Easements, Mortgages, and Land Sale, this textbook is essential reading for LLB students in Caribbean universities and students on CAPE Law courses. The extensive coverage of land law from a Caribbean perspective and analysis of the substantive laws of several jurisdictions will also make this text an invaluable reference tool for practitioners. A treasury of law relating to many different types of property in the South Pacific region: an area of cultural diversity, economic development and strong tradition. While land remains of key significance, other forms of property, from custom property to intellectual property, are also important. This book explores the relationship between space, subjectivity and property in order to invert conventional socio-legal understandings of property. Sarah Keenan demonstrates that new political possibilities for property may be unveiled by thinking about property in terms of space and belonging, rather than exclusion. Drawing on feminist and critical race theory, this book shifts focus away from the propertied subject and on to the broader spaces in and through which the propertied subject is located. Using case studies, such as analyses of compulsory leases under Australia's Northern Territory Intervention and lesbian asylum cases from a range of jurisdictions, Keenan argues that these spaces consist of networks of relations that revolve around belonging: not just belonging between subject and object, as property is

traditionally understood, but also the less explored relation of belonging between the part and the whole. This book therefore offers a conceptually useful way of analysing a wide range of socio-legal issues. It will be of relevance to those working in the area of property and legal geography, but also to those with more general interests in socio-legal studies, social and political theory, postcolonial studies, critical race studies and gender and sexuality studies. This comprehensive text covers all of the materials relevant to property law in a detailed and thorough manner. The second edition examines the basic tenants of property law, as well as specific property interests such as land interests and the way in which these interests are conveyed, registered and coordinated. The book considers the development of native title as a legally recognised form of property in Australia and how such an interest sits within the common law and statutory infrastructure. Principles of Property Law is a vital book for students studying this complex area and is also a valuable addition to the library of academics and practitioners interested in this field. This volume is for students and scholars of intellectual property law, practitioners seeking creative arguments from across the field, and policymakers searching for solutions to changing social and technological issues. The book explores the tensions between two fundamentally competing demands made of IP law. Why property law needs globalization strategies -- Local to global : an institutional analysis -- Land -- Tangible goods, monetary claims, investment securities -- Intellectual property, data, and digital assets -- Security interests and proprietary priorities in insolvency This work has been selected by scholars as being culturally important and is part of the knowledge base of civilization as we know it. This work is in the public domain in the United States of America, and possibly other nations. Within the United States, you may freely copy and distribute this work, as no entity (individual or corporate) has a copyright on the body of the work. Scholars believe, and we concur, that this work is important enough to be preserved, reproduced, and made generally available to the public. To ensure a quality reading experience, this work has been proofread and republished using a format that seamlessly blends the original graphical elements with text in an easy-to-read typeface. We appreciate your support of the preservation process, and thank you for being an important part of keeping this knowledge alive and relevant. The first book to examine the critical area of land law from a feminist perspective, it provides an original and critical analysis of the gendered intersection between law and land; ranging land use and ownership in England and Wales to Botswana, Papua New Guinea and the Muslim world. The authors draw upon the diverse disciplinary fields of law, anthropology and geography to open up perspectives that go beyond the usually narrow topography and cartography of land law. Addressing an unorthodox variety of sites where questions of women's access and rights to land are raised, this book includes chapters on: shopping malls ancient monuments nature reserves housing estates the family home. An interdisciplinary and enlivening account of feminist perspectives on land law, it is an excellent addition to the bookshelves of students and researchers in legal studies, gender studies, social anthropology and social geography. *Landscape: Property, Environment, Law* considers the ways in which property law transforms both natural environments and social economies. Addressing law's relationship to land and natural resources through its property regime, *Landscape* engages the abstract philosophy of property law with the material environments of place. Whilst most accounts of land law have contributed cultural analyses of historical and political value predominantly through the lens of property rights, few have contributed analyses of the natural consequences of property law through the lens of property responsibilities. *Landscape* does this by addressing the relationship between the commodification of land, instituted in and by property law, and ecological and economic histories. Its synthesis of property law and environmental law provides a genuinely transdisciplinary analysis of the particular cultural concepts and practices of land tenure that have been created, and exported, across the globe. In *The Idea of Property in Law*, Penner considers the concept of property and its place in the legal environment. Penner proposes that the idea of property as a "bundle of rights" - the right to possess, the right to use, the right to destroy etc. - is deficient as a concept, failing to effectively characterise any particular sort of legal relation, and evading attempts to decide which rights are critical to the "bundle". Through a thorough exploration of property rules, property rights, and the interests which property serves and protects, Penner develops an alternative interpretation and goes on to consider how property interacts with the broader legal system. The UK is one of the few countries in the world where home ownership really strikes a chord

with the population like no other. As the population grows then the only way to house them is to build more new property. This in itself has become a niche area of law. Many lawyers shy away from it due to the time pressure often placed and different nuances to already existing property. This book provides a practical guide for practitioners on how to approach such matters based on the writers' practical experience of dealing with these niche areas of law and their experience from running seminars on the topic for other lawyers across England and Wales. Planning, new homes warranties and the now infamous Help to Buy scheme will all be considered from a pragmatic perspective. ABOUT THE AUTHORS Paul Sams is a practicing property Solicitor actively involved in residential, residential and commercial development with niche specialisms in leasehold enfranchisement matters plus equity release. Rebecca East is a practicing Solicitor handling all aspects of residential conveyancing particularly new build purchases and equity release. CONTENTS Chapter One - Introduction Chapter Two - What Is "New Build Conveyancing"? Chapter Three - Planning and Building Regulations Chapter Four - New Homes Warranties Chapter Five - Searches Chapter Six - Mortgages Chapter Seven - Help to Buy Chapter Eight - Estate Charges Chapter Nine - Completion Chapter Ten - Conclusion Editorial Advisory Board Professor I.H. Dennis (University College, London) Professor R.W. Rideout (University College, London) Professor J.A. Usher (University of Edinburgh) In Property Law: Cases and Materials, Roger Smith brings together in one volume those cases and materials that a property law student is most likely to require to support a course in the subject. Law Commission reports and other materials supplement the extracts from cases and statutes which lie at the heart of the book. The author outlines the general principles of each topic, keeping the text deliberately light on references and minor points of detail, in order that the key principles are brought to the fore. In addition to drawing attention to the grey areas and controversies revealed in the extracts, the commentary and questions of varying difficulty link and critically discuss the various extracts, setting them in context. The result is a portable library of key sources which students will find readily digestible and navigable. This book is structured along the lines of, and is an indispensable companion to, the author's own textbook on this subject (Property Law, also in this series), but could be used with a Property Law is the perfect companion to guide the reader through the intricacies of the conveyancing process. Drawing on the author's considerable experience of legal practice, and suitable for use on courses with either a residential or a commercial conveyancing focus, this book offers lively and accessible explanations of often complex processes. With highly practical guidance on how to approach each stage of a conveyancing transaction in practice, this book is ideal for use as a core text on the Legal Practice Course or as a valuable source of reference where knowledge of the conveyancing process is essential. Digital formats and resources This edition is available for students and institutions to purchase in a variety of formats, and is supported by online resources. - Access to a digital version of this book comes with every purchase to enable a more flexible learning experience--12 months' access to this title on Law Trove will be available from 15 July 2021. Access must be redeemed by 30 June 2022. - The online resources include: multiple choice questions; case study documentation; guide to completing prescribed clauses in leases; problem questions and answer guidance; interactive timelines; additional chapter (Commonhold); lists of wider reading and websites for further information; and figures from the book. This book explores the emergent and internationally widespread phenomenon of precariousness, specifically in relation to the home. It maps the complex reality of the insecure home by examining the many ways in which precariousness is manifested in legal and social change across a number of otherwise very different jurisdictions. By applying innovative work done by socio-legal scholars in other fields such as labour law and welfare law to the home, Law and the Precarious Home offers a broader theoretical understanding of contemporary 'precarisation' of law and society. It will enable reflections upon differential experience of home dependent upon class, race and gender from a range of local, national and cross-national perspectives. Finally it will explore the pluralisation of ideas of home in subjective experience, social reality and legal form. The answers offered in this book reflect the expertise and standing of the assembled authors who are international leaders in their field, with decades of first-hand practical and intellectual engagement with the area. Intellectual Property Law examines emerging intellectual property (IP) issues through the bifocal lens of both economic analysis and individual or social justice theories. This study considers restraints on IP rights both internal and external to IP law and explores

rights disequilibria from the perspective of both the rationale of IP law and the interface with competition law. The expert contributors discuss the phenomenon in various contexts of patent, trade secret; and copyright, each a tool to incentivize the growth of knowledge beyond innovation and creativity. This timely book will strongly appeal to academics, scholars, and postgraduate and PhD students interested in where and how the balance to intellectual property law is, should or could be set. Policymakers will also find this insightful resource invaluable. This book provides a comprehensive critique of the idea that 'intellectual property' exists as an object that can be owned. Intellectual property law faces the challenge of balancing the interests of right holders and users in the face of technological change and inequalities in information access. Concepts of Property in Intellectual Property Law offers a collection of essays which reflect on the interaction between intellectual property and broader, more traditional, notions of property. It explores the way in which differing interpretations of the concept of property can affect the scope of protection in the law of copyright, patent, trade marks and confidential information. With contributions from leading and emerging scholars from a variety of jurisdictions, the book demonstrates how concepts of property can assist in shaping a conceptually coherent and balanced response to the challenges faced by intellectual property law. The Idea of Home in Law: Displacement and Dispossession explores an important set of legal and policy issues surrounding the concepts of home and homelessness, taking a growing area of legal scholarship into the new arena of human rights and international law. The collection considers the ideas concerning home - both in the sense of the dwelling place as a special type of property, and territorial claims to homeland - which underpin many contemporary legal problems, by examining a range of contexts where people are displaced or dispossessed from their homes. The essays focusing on dispossession consider themes ranging from mortgage and rent arrears in the UK to responses to the foreclosure crisis in the USA, and from eviction for the purposes of economic development in South Africa to the exclusion of asylum seekers from the UK's social housing and welfare provision, and within the framework of the European Convention on Human Rights. The displacement theme, meanwhile, examines transnational 'home' issues from the experiences of exiles and refugees in areas of conflict to the impact of the broader context of economic, social and cultural rights on attempts to protect housing and home through international law. At the heart of each essay the contributors, experts from across the fields of law, policy, and housing rights, examine the circumstances in which displacement and dispossession take place, and reconsider how law and policy respond to such circumstances with a particular focus on the impact of loss of home for the human person. At a time of particular and increasing concern about security of tenure and the role of law and policy in protecting people who are vulnerable to forced eviction, The Idea of Home in Law presents a bold opportunity to raise questions about the 'rights' and norms associated with housing and home, and to generate new insights for scholarship and for national and international policy debates concerning displacement and dispossession. First published in 1997, this volume constitutes a collection of new papers by more than 20 United Kingdom and International experts on general and specific issues relating to the reform of all aspects of property law. Topics covered include the language of property law and the dangers of reform, the role of the Law Commission and the workings of Parliamentary procedures, registration of title to land, landlord and tenant, land pollution, mortgages, sale of goods, the Hague Convention on trusts, together with general comparative papers and papers dealing with specific issues of property law reform affecting Hong Kong, Ireland, Scotland and South Africa. The volume arises out of the successful conference 'The Reform of Property Law' hosted by the Centre for Property Law at The University of Reading in 1996. The third edition of EU Justice and Home Affairs Law is comprehensively updated and expanded to take account of the major changes introduced by the Treaty of Lisbon and the development of legislation and case-law since the last edition. It includes analysis of the widened jurisdiction of the EU's Court of Justice, the revised rules on the participation of the UK, Ireland and Denmark and relations with non-EU countries in this field, and of the impact of the new framework for human rights law in the EU, including the binding status of the EU's Charter of Fundamental Rights and the EU accession to the ECHR. In the area of immigration and asylum law, this new edition scrutinizes a wide range of issues that include; the development of the EU's border control agency; the adoption of an EU visas code; EU databases (such as the Visa Information System and the second-generation Schengen Information System); the further

development of the Common European Asylum System; the EU's Returns Directive; and the Blue Card Directive for the admission of highly-skilled workers. In the area of civil law, this new edition contains an updated overview of recent legislation, including EU rules on conflicts of law, maintenance, payment orders, small claims and mediation. As regards criminal law and policing, the new edition includes detailed analysis of EU legislation and case law on issues such as suspects' and victims' rights, the European Arrest Warrant, the transfer of prisoners, other post-trial and pre-trial decisions, double jeopardy rules, EU anti-terrorist sanctions, data protection, and the development of Europol and Eurojust. As companies and organisations increasingly operate across national boundaries, so the incentive to understand how to acquire, deploy and protect IP rights in multiple national jurisdictions has rapidly increased. Transnational Intellectual Property Law meets the need for a book that introduces contemporary intellectual property as it is practiced in today's global context. Focusing on three major IP regimes - the United States, Europe and China - the unique transnational approach of this textbook will help law students and lawyers across the world understand not only how IP operates in different national contexts, but also how to coordinate IP protection across numerous national jurisdictions. International IP treaties are also covered, but in the context of an overall emphasis on transnational coordination of legal rights and strategies. An examination of issues relating to reform of property law ranging from historical and comparative to the critical discussion of special current proposals. Nationally recognized litigator, Daniel P. Dalton, shares expert insights on litigating three types of religious property disputes. This information will be valuable for religious organizations and their counsel. The Idea of Home in Law: Displacement and Dispossession explores an important set of legal and policy issues surrounding the concepts of home and homelessness, taking a growing area of legal scholarship into the new arena of human rights and international law. The collection considers the ideas concerning home - both in the sense of the dwelling place as a special type of property, and territorial claims to homeland - which underpin many contemporary legal problems, by examining a range of contexts where people are displaced or dispossessed from their homes. The essays focusing on dispossession consider themes ranging from mortgage and rent arrears in the UK to responses to the foreclosure crisis in the USA, and from eviction for the purposes of economic development in South Africa to the exclusion of asylum seekers from the UK's social housing and welfare provision, and within the framework of the European Convention on Human Rights. The displacement theme, meanwhile, examines transnational 'home' issues from the experiences of exiles and refugees in areas of conflict to the impact of the broader context of economic, social and cultural rights on attempts to protect housing and home through international law. At the heart of each essay the contributors, experts from across the fields of law, policy, and housing rights, examine the circumstances in which displacement and dispossession take place, and reconsider how law and policy respond to such circumstances with a particular focus on the impact of loss of home for the human person. At a time of particular and increasing concern about security of tenure and the role of law and policy in protecting people who are vulnerable to forced eviction, The Idea of Home in Law presents a bold opportunity to raise questions about the 'rights' and norms associated with housing and home, and to generate new insights for scholarship and for national and international policy debates concerning displacement and dispossession. Presenting papers from the 1998 Contemporary Issues in Property Law conference, this book examines a wide range of issues in property law of current interest. An international collection of contributors draw on their experiences from a wide range of backgrounds and jurisdictions. place of prosecutorial discretion. Protection orders that prohibit all contact between suspected abusers and their partners are designed to end relationships - even over victims' objections. The law's rapidly changing picture of the home has fundamentally moved the boundary between public and private space. The result, unintended by domestic violence reformers, is to reduce the autonomy of women in relation to the state." --Book Jacket. In 2009, the Association for the Advancement of Teaching and Research in Intellectual Property (ATRIP) dedicated its yearly congress to the theme Horizontal Issues in IP Law; Uncovering the Matrix. That theme and the main concern of the so-called Intellectual Property of Transition Project have been brought together by the editors of the current book under the intriguing title The Structure of Intellectual Property Law Questioned, is whether the apparent compartmentalisation and fragmentation of actual intellectual property law can be based upon a coherent system that supports the entire field. In other words: it is questioned whether one

organising principle which underlies the different parts of this domain of law can be found. Not surprisingly, the answers given by the various experts that contribute to this book tend to differ, mainly depending on their field of interest: copyright law, patent law, trademark law, the main tendency being in favour of tailoring instead of unifying both from the perspective of efficiency and that of economics. However, even more interesting than the answers to the question posed, are the stimulating and thought-provoking analyses which the book offers. This is really a book one should read if one is interested in the conjunction of the basic principles of intellectual property law and how they work out in practice. Willem Grosheide, Utrecht University, The Netherlands Today, intellectual property is a broad genus embracing various more specific species - invention patents, copyright, trade marks and so forth. Anyone concerned with how this ever-expanding grouping is developing should read the fourteen essays in this book. Written by leading scholars, they tackle not only the relationships between the species, but also those between sub-species. Originally presented as papers to the Association for Teaching and Research in IP, the writing is both subtle and full of verve. Strongly recommended. William Cornish, Cambridge University, UK This well-researched and highly topical book analyses whether the ever-increasing degree of sophistication in intellectual property law necessarily leads to fragmentation and inconsistency, or whether the common principles informing the system are sustainable enough to offer a solid and resilient framework for legal development. Shortlisted for the Peter Birks Prize for Outstanding Legal Scholarship 2009 In its essence, property law has to provide answers to two very difficult questions: who is entitled to use property, and how are they entitled to use it? Property law is therefore inherently difficult, but not impossibly so. It consists of an ordered and logical system, which aims to take the sting out of fierce disputes. This book provides a new perspective on property law. By setting out an underlying structure, it allows the reader to understand the fundamental principles of this difficult subject. By providing detailed coverage of individual topics, it shows how those principles apply in practice and provides a comprehensive resource for anyone studying, teaching, researching or practising in property law. The book is written in an accessible style, with frequent summaries and, in both its pages and companion web-site it makes use of helpful visual aids. It is ideal reading for law students seeking a rock-solid understanding of how property law and land law work, and contains sufficient detail for use as a course book in: " Property Law " Land Law " Personal Property Law The book also provides detailed analysis of core topics in: " Equity & Trusts " Commercial Law " Unjust Enrichment & Restitution See the companion website for this book: [www.hartpub.co.uk/companion/propertylaw.html](http://www.hartpub.co.uk/companion/propertylaw.html). Modern Intellectual Property Law combines coverage of each intellectual property right granted for creations of the mind into a thoughtful, unified textbook. Deconstructing the fundamental topics into short, clear sections separated by subheadings throughout, Colston and Galloway's text is the ideal student companion to this intriguing area of the law. This third edition has been completely revised to bring it up to date with the latest debate and changes to the law. All significant recent developments are covered including the continuing controversy over patents for computer-implemented inventions and biotechnological inventions, the House of Lords' developments of patent law, the ECJ jurisprudence relating to trade mark dilution and comparative advertising, as well as the database right, and international efforts to reconcile copyright with peer-to-peer file sharing. This text also discusses the ongoing effort to achieve an appropriate balance between intellectual property and competition law in order to protect market competition while retaining key incentives to drive the process of innovation. Written for students, this accessible and comprehensive textbook provides the perfect starting point for anyone studying intellectual property law in the UK. Property Law combines accessible overviews of the conveyancing procedure with a pragmatic approach. Enhanced by realistic case studies, examples, and professional conduct points throughout, this text equips the reader with the knowledge and skills required to conduct conveyancing transactions in practice.
