World Education Indicators May 31 2020 This statistical annex provides information on principal features of educational, social and economic development for 125 countries worldwide. Excluded are countries with populations of less than one million people in 1986. Countries are classified into four major economic groups -- low-income, lower middle-income, upper middle-income and high-income economies. The 36 countries with per-capita incomes of less than \$400 are classified as low-income economies. The 41 lower middle-income economies are those with per-capita incomes between \$400 and \$1,700. The 22 upper middle-income countries are those with per-capita incomes between \$1,700 and \$5,000. The 26 high-income countries are those with per-capita incomes greater than \$5,000. Within each economic group, countries are listed in ascending order of income per-capita with the exception of a few countries for which per-capita income could not be calculated. Summary measures of all indicators appear in the bands within each table.

Preparing Teachers for Deeper Learning Apr 10 2021 Preparing Teachers for Deeper Learning answers an urgent call for teachers who educate children from diverse backgrounds to meet the demands of a changing world. In today's knowledge economy, teachers must prioritize problem-solving ability, adaptability, critical thinking, and the development of interpersonal and collaborative skills over rote memorization and the passive transmission of knowledge. Authors Linda Darling-Hammond and Jeannie Oakes and their colleagues examine what this means for teacher preparation and showcase the work of programs that are educating for deeper learning, equity, and social justice. Guided by the growing knowledge base in the science of learning and development, the book examines teacher preparation programs at Alverno College, Bank Street College of Education, High Tech High's Intern Program, Montclair State University, San Francisco Teacher Residency, Trinity University, and University of Colorado Denver. These seven programs share a common understanding of how people learn that shape similar innovative practices. With vivid examples of teaching for deeper learning in coursework and classrooms; interviews with faculty, school partners, and novice teachers; surveys of teacher candidates and graduates; and analyses of curriculum and practices, Preparing Teachers for Deeper Learning depicts transformative forms of teaching and teacher preparation that honor and expand all students' abilities, knowledges, and experiences, and reaffirm the promise of educating for a better world.

**The Oxford Handbook of European Islam** Aug 03 2020 For centuries, Muslim countries and Europe have engaged one another through theological dialogues, diplomatic missions, political rivalries, and power struggles. In the last thirty years, due in large part to globalization and migration from Islamic countries to the West, what was previously an engagement across national and cultural boundaries has increasingly become an internalized encounter within Europe itself. Questions of the Hijab in schools, freedom of expression in the wake of the Danish Cartoon crisis, and the role of Shari'a have come to the forefront of contemporary European discourse. The Oxford Handbook of European Islam is the first collection to present a comprehensive approach to the multiple and changing ways Islam has been studied across European countries. Parts one to three address the state of knowledge of Islam and Muslims within a selection of European countries, while presenting a critical view of the most up-to-date data specific to each country. These chapters analyze the immigration cycles and policies related to the presence of Muslims, tackling issues such as discrimination, post-colonial identity, adaptation, and assimilation. The thematic chapters, in parts four and five, examine secularism, radicalization, Shari'a, Hijab, and Islamophobia with the goal of synthesizing different national discussion into a more comparative theoretical framework. The Handbook attempts to balance cutting edge assessment with the knowledge that the content itself will eventually be superseded by events. Featuring eighteen newly-commissioned essays by noted scholars in the field, this volume will provide an excellent resource for students and scholars interested in European Studies, immigration, Islamic studies, and the sociology of religion.
