FIELD MEDICAL SERVICE TECHNICIAN (FMST) - 2021

Sep 09 2021 COURSE

DESCRIPTION: During this 8-week course, you will have a mix of classroom and field training. Emphasis is placed on learning field medicine by using the principles of Tactical Combat Casualty Care (TCCC). This includes familiarization with USMC organization and procedures, logistics, and administrative support in a field environment. Additionally, training will include general military subjects, individual and small unit tactics, military drills, physical training/conditioning, and weapons familiarization with the opportunity to fire the M16/M4 service rifle.

Completion of FMST results in the student receiving Navy Enlisted Classification HM-L03A. See "Student Material" to download a copy of the Student Manual that you will use during your training.

CONTENTS: 1. TCCC Guidelines for Medical Personnel, 15 December 2021, 19 pages 2. JTS Clinical Practice Guidelines, 2,222 total pages - current as of 16 December 2022 3. FIELD MEDICAL SERVICE TECHNICIAN FMST, 2021, 3,252 pages

Command Philosophy My
philosophy is basic...provide
the highest quality service
possible to every person you
encounter. We are an
institution of higher learning;
we need to be the best with
everything we do. We are
preparing the next generation
of heroes for the greatest
fighting force on the planet -
the 8404 Hospital Corpsman
assigned to the United States
Marine Corps. They operate at
the tip-of-the spear providing
combat medicine to our
operational forces; they are
critical to the success of the
Navy & Marine Corps Medicine
Team. What each one of us
does on a daily basis matters,
regardless of our job. We all
contribute to the mission. No
one job is more important than
the other. If just one link (team
member) in this chain fails to
perform a portion of the
mission to standard, we all fail.

You have the ability to make a
positive difference in peoples'
lives every day. Every member
of this team should ask
themselves, "Am I living by our
core values and making
decisions that are consistent
with these values when I
interact with students, staff
and the American public." Key
points: - Know your chain of
command and how to use it.
You have not exhausted your
chain of command at FMTB-
West until the issue reaches
me. - If you are lacking
something to perform your
mission, bring it to the
attention of leadership so we
can promptly address it. - Any
safety issue should immediately
be brought to leadership. -
Continually strive to improve
processes; ask for help before
it's too late (in all aspects of
your life and career). - If you
see a problem, fix it or bring it
to the attention of someone
who can. Don't ignore it. -
Supporting each other is just as
important as supporting the
mission. - Continue the
relentless pursuit of customer
satisfaction; feedback is a
valuable tool in life and career.
- Basic military courtesy should
be a part of everyday life. -
Always strive to do the right
thing, even when no one is
looking or when tempted to
take the "easy" wrong. As a
leader, I believe all members of
the team are important. Our
civilian shipmates are essential
to the success of our mission.
As a military leader, I believe,
as the Sailor creed says, "I
proudly serve my country's
Navy combat team with Honor,
Courage and Commitment. I
am committed to excellence

and the fair treatment of all". I
cannot over emphasize the
importance of leadership from
E-1 to O-6, everyone has a part;
I expect officers to lead from
the front by setting the
example. Be sure that regularly
scheduled performance
counseling sessions are
conducted for military and
civilian employees. Cover the
good which should be
sustained as well as the areas
which need improvement.
Although I like to be informed,
I believe in allowing leaders to
lead, managers to manage. A
big part of my job is to provide
you the support systems
necessary for you to
accomplish your mission. Tell
me what you need and don't
worry how it will be resourced.
Let me worry about that.

Over 2,300 total pages ...
OVERVIEW Tactical Combat Casualty Care (TCCC) was developed to emphasize the need for continued improvement in combat pre-hospital care. The Committee on Tactical Combat Casualty Care (CoTCCC) was established in 2001 and is part of the

Defense Health Board. CoTCCC is a standing multi-service committee charged with monitoring medical developments in regards to practice, technology, pharmacology and doctrine. New concepts in hemorrhage control, airway management, fluid resuscitation, analgesia, antibiotics and other lifesaving techniques are important steps in providing the best possible care for our Marines and Sailors in combat. The TCCC guidelines are published every 4 years in the Prehospital Trauma Life Support manual. It has been recognized that TCCC guidelines and curriculum will need to change more often than the 4-year cycle of the PHTLS textbook publication. The National Association of Emergency Medical Technicians (NAEMT) will include the updated TCCC guidelines and curriculum on its website as they are approved as a way to help get this new information out to the combat medical personnel in the military that need it.

PRINCIPLES OF TACTICAL COMBAT CASUALTY CARE (TCCC) The principles of Tactical Combat Casualty Care are fundamentally different from those of traditional civilian trauma care, where most medical providers and medics train. These differences are based on both the unique patterns and types of wounds that are suffered in combat and the tactical conditions medical personnel face in combat. Unique combat wounds and tactical conditions make it difficult to determine which intervention to perform at what

time. Besides addressing a casualty's medical condition, responding medical personnel must also address the tactical problems faced while providing care in combat. A medically correct intervention at the wrong time may lead to further casualties. Put another way, "good medicine may be a bad tactical decision" which can get the rescuer and the casualty killed. To successfully navigate these issues, medical providers must have skills and training oriented to combat trauma care, as opposed to civilian trauma care. The specifics of casualty care in the tactical setting will depend on the tactical situation, the injuries sustained by the casualty, the knowledge and skills of the first responder, and the medical equipment at hand. In contrast to a hospital Emergency Department setting where the patient IS the mission, on the battlefield, care of casualties sustained is only PART of the mission. TCCC recognizes this fact and structures its guidelines to accomplish three primary goals: 1. Treat the casualty 2. Prevent additional casualties 3. Complete the mission In thinking about the management of combat casualties, it is helpful to divide care into three distinct phases, each with its own characteristics and limitations.
